

# Walk-in Immunization Clinics, July 2011

Please take Immunization Card with you.

## Eligibility for the receipt of VFC (Vaccines for Children) vaccines

To be eligible, children must be 18 years of age or younger and meet any one of the following criteria:

1. Be eligible for Medi-Cal or Child Health and Disability Program (CHDP) or
2. Have no health insurance (be uninsured) or
3. Be American Indian or Alaskan Native

Note: Children who have health insurance that does not cover immunizations may receive VFC vaccines, only at federally qualified health centers, rural health clinics, or local health department clinics. Children enrolled in the Healthy Families program (California's Children's Health Insurance Plan) are not VFC-eligible. Please contact practice to determine acceptance of new patients, business open hours, and cost associated with the administration of VFC supplied vaccines. Vaccines are provided at no cost to participating providers. Providers may impose a fee for the administration of a qualified pediatric vaccine not to exceed \$17.55 for non-Medi-Cal patients. For established VFC-eligible patients and other VFC-eligible patients that the provider chooses to immunize, VFC immunization can not be denied due to the inability to pay an administration fee.
