

Another important resource for your child is the internet. As you probably know, there are dozens of valuable sites to help your child practice skills, find important information for reports and projects, or play educational games. Here is a list of common websites that you and your child can explore together. We definitely recommend that parents always supervise their children's use of the internet.

<http://www.coronapubliclibrary.org/> Search your book before you go to the library.
